IPAK continues to respond to their Clients' printing needs by offering even more in-house digital capabilities. Five state of the art black and color digital presses are now part of IPRINT*digital*, the company's in-house turnkey short-run printing operation.

The resources include:

- a Xerox Nuvera 120 B&W Digital Production System
- a Xerox 4110 B&W system with folding and stapling capability
- a Xerox DC250 4/C system
- 2 Konica/Minolta Biz Hub Pro Production Print 4/C C500 print systems with folding, stitching & punching capability
- a Xerox Freeflow Scanning system

According to Allan Pinsky, CEO, "IPAK will continue to expand this division of the company to keep up with the demand in the marketplace. These presses are the perfect compliment to our in-house finishing operations."

IPAK, a member of the Women's Business Enterprise National Council (WBENC), is a comprehensive sole source manufacturer of creative packaging. The company develops, oversees and manufactures a packaging project from start to finish. IPAK adds value by becoming an extension of their clients' in house production and marketing team. All packaging structural design, project management, digital printing, post press manufacturing and fulfillment operations are done by a staff of 100 at their 52,000 sq foot facility in Pennsauken NJ. IPAK's client base is national and includes The McGraw-Hill Companies, John Wiley & Sons, ETS, Harper Collins and Rainbow-Media.
